PROFESSIONAL SUMMARY

Freelance Full-Stack Software Engineer working since 2022, specializing in production-grade web applications, SaaS platforms, dashboards, and developer tooling. Strong hands-on experience with Next.js App Router, React, TypeScript, NestJS, Fastify, Prisma, PostgreSQL, authentication, RBAC, real-time features, file/document workflows, and VPS/cloud deployment. Built systems across legal operations, e-commerce scheduling, early childhood education, AI platforms, and open-source developer tooling.

TECHNICAL SKILLS

- Frontend: Next.js 15/16, React 18/19, TypeScript, Tailwind CSS, HeroUI, Heroicons, Framer Motion, React Hook Form, Zod, Yup, TanStack Query, Zustand, SWR, next-intl
- Backend: NestJS 11, Fastify, Express, REST APIs, WebSockets, Socket.IO, JWT, OAuth, RBAC, Passport, class-validator, BullMQ, Redis, background jobs
- Database and ORM: PostgreSQL, Prisma ORM, Prisma migrations, schema composition, seed scripts, database modeling
- DevOps and Tools: Git, GitHub Actions, Docker, NGINX, PM2, VPS deployment, Vercel, Bun, pnpm, Turbo, Vitest, Jest, Playwright, Swagger
- Product Areas: SaaS platforms, admin dashboards, multi-tenancy, law-office systems, e-commerce, scheduling, document management, invoices, reports, localization, Arabic RTL interfaces

PROFESSIONAL EXPERIENCE

Freelance Full-Stack Software Engineer

Self-employed / Client Projects | 2022 - Present | Remote

- Built and shipped full-stack web applications for SaaS, e-commerce, dashboards, internal systems, and business automation using Next.js, React, TypeScript, NestJS, Prisma, and PostgreSQL.
- Handled frontend architecture, backend APIs, database modeling, authentication, role-based access control, form validation, real-time features, document workflows, deployment, and production troubleshooting.
- Delivered Arabic and English interfaces with responsive layouts, RTL support, clean component structure, and maintainable feature-based architecture.
- Worked directly with client-style requirements, turning rough business ideas into working product modules, MVPs, admin dashboards, and production-ready workflows.

PROJECT EXPERIENCE

Wexts - Production Full-Stack Toolkit

Founder / Full-Stack Developer | Public GitHub: <https://github.com/ziadmustafa1/wexts>

- Built a production-focused toolkit combining Next.js and NestJS in a single production runtime using Fastify.
- Implemented generated typed RPC, CLI/codegen workflows, production start commands, health checks, and security diagnostics.
- Designed Wexts Shield for application-layer protection including security headers, CORS controls, CSRF checks, body/request limits, route policies, rate limiting, concurrency limits, audit logging, and redaction.
- Maintained a TypeScript monorepo with pnpm workspaces, Turbo build orchestration, tests, typecheck, linting, release checks, and documentation.

Falak Legal / Lexniva - Law Office Management SaaS

Full-Stack Developer | Private SaaS Project

- Built a bilingual Arabic/English law-office management platform for cases, hearings, clients, tasks, invoices, documents, expenses, users, roles, settings, audit logs, and dashboards.
- Developed the frontend with Next.js 16, React 19, HeroUI, Tailwind CSS, TanStack Query, Zustand, React Hook Form, Zod, next-intl, PDF/QR generation, and real-time client features.
- Developed backend APIs with NestJS 11, Fastify, Prisma, PostgreSQL, JWT authentication, MFA/OTP support, WebSockets, BullMQ, Redis/cache, scheduled jobs, S3-compatible storage, CSV/Excel exports, and Swagger documentation.
- Implemented role-based access control, case-level permissions, document workflows, financial reporting, encrypted sensitive-data backfills, and production deployment workflows.

Time Slot Manager - Appointment and Delivery Slot Platform

Full-Stack Developer | Private Marketplace-Ready Project

- Built a Next.js and Prisma platform for managing branches, delivery methods, slot templates, actual slots, blackout dates, reservations, merchant settings, and storefront availability widgets.
- Implemented authentication, merchant dashboard flows, slot capacity logic, reservation rules, PostgreSQL persistence, validation, and testable slot-generation behavior.
- Designed integration-ready platform layers for e-commerce ecosystems such as OAuth connection flows, webhook intake, store identification, settings synchronization, and idempotent order/reservation handling.

Hikaya Stories - Arabic Nursery Education Platform

Full-Stack Developer | Private SaaS Project

- Built an early childhood educational platform for Arabic nursery content with separate Next.js frontend and NestJS backend applications.
- Implemented authenticated content access, admin-only official content creation, nursery user role, story/video/podcast structure, and thin route architecture.
- Used Next.js 16, React 19, HeroUI, React Hook Form, Zod, NestJS 11, Prisma, PostgreSQL, Redis, BullMQ, Cloudflare R2, Docker Compose, and Swagger documentation.

Aetheris AI - AI Platform Frontend and Backend

Full-Stack Developer | Private Project

- Built a modern Next.js frontend using React 19, HeroUI, Tailwind CSS, PWA support, React Hook Form, Axios, charts, and real-time Socket.IO client communication.
- Developed NestJS/Fastify backend services with Prisma, PostgreSQL, JWT authentication, OAuth, file upload/storage integrations, WebSockets, Stripe integration, security middleware, and testing setup.
- Deployed backend infrastructure using VPS-oriented workflows with production builds, PM2/NGINX patterns, environment validation, and health endpoint checks.

countries-cities-ar - Open-Source Geographic Data Package

Author / Maintainer | Public GitHub: <https://github.com/ziadmustafa1/countries-cities-ar>

- Published a TypeScript package providing multilingual country/city/state data for Arabic, English, and French application use cases.
- Configured ESM/CJS exports, TypeScript declaration output, tsup builds, Vitest tests, linting, and npm publishing workflow.

ADDITIONAL PROJECTS

- E-commerce systems: product catalogs, favorites, user/admin/customer-service roles, order tracking, product management, and dashboard flows.
- Admin and ERP dashboards: role-based interfaces, analytics cards, CRUD workflows, data tables, and responsive layouts.
- Medical and clinical apps: appointment-style interfaces, patient-facing pages, and admin panels.
- Portfolio and landing pages: responsive marketing websites, Arabic/English UI, SEO-focused layout, and component-based design systems.

WORK STYLE

- Keeps page and route files thin; separates feature UI, SSR logic, API calls, and business rules.
- Prioritizes typed code, validation schemas, predictable folder structure, reusable components, and backend-owned business logic.
- Builds Arabic RTL interfaces with attention to localization, clean UI hierarchy, and production maintainability.
